

Javascript All Pending Questions

Objects

- Merge two objects
- Remove a property from an object
- Check if an object is empty or not
- Loop an object to print keys and values
- Spreading an object and changing the key
- Remove key from an object
- Key corresponding to the largest value in an object
- Remove key-value pairs from an object
- Find key corresponding to the highest value in an object
- Loop object and print key-value pairs one by one
- Remove object keys corresponding to odd numbers
- Sum of values of an object structure

Arrays

- Digit missing in an array
- Remove multiple of three from an array
- Remove the nth element from an array
- Convert the elements to uppercase using map()
- Elements common in two arrays
- Count characters in an array
- Array manipulation
- Add two numbers into an array using splice
- Create a new array combining two arrays with spread
- Array .forEach flip signs of numbers
- Remove second last element from an array
- Push all zeros to the end of the array
- Remove multiples of three from an array
- Find second largest from an array
- Function to average even numbers from an array
- Function to remove middle element from an array

Object Destructuring & Array Destructuring

- Object / array destructuring

Function Methods

- Parameters example with function
- Modify an arrow function to find sum of n numbers

Generator Functions

- Generator function to print multiples of 5 between 1 to 100
- Generator function example
- Generator function to yield multiples of a given number endlessly
- Generate even numbers indefinitely using generator function
- Implement generator function to print alternative even numbers in reverse order

String Manipulation

- Capitalize last letter of a string
- Check if a string is a palindrome or not
- Rearrange 'hello world' to 'world hello'
- Capitalize first and last letters of strings
- Throw error if argument isn't a string
- Remove a character from a string
- How to remove a character from a string
- Function to count vowels in a string

Array Reduce Methods

- Largest odd number from an array using reduce
- Longest string in an array using reduce()
- Largest element if it's a string using reduce()
- Number of small strings in a string array using reduce()

Array Filtering & Removing Elements

- Deep copy of array and object
- Filter numbers from a mixed array
- Remove duplicates from an array
- Delete the repeated elements from an array without Set
- Remove duplicate even numbers from an array

- Remove even numbers from an array
- Remove odd numbers from an object
- Sum of positive numbers in a mixed array

Timers & Delays

- Cancel setTimeout after 1 second
- Print 1 to 10 with a time delay of 1 sec using setInterval
- Countdown timer that counts down from 10 to 0 and stops
- Print 10, 8, 6...2 with a time delay of 1 sec
- `delay(3).then(data => console.log(data))`
- Creating the delay function using Promise
- Calling async function without await
